

**GBST MARKET
ACCESS™**

HOW TO SWITCH ON ONE MILLION NEW ACCOUNTS

GBST's substantial customer network in Australia and New Zealand has created a significant opportunity for financial service providers. These include funds managers; master trust and wrap providers; cash management providers; margin lenders; ratings, news and research services; and market data providers.

A single connection to GBST Shares™, the securities trading and settlement system preferred by the majority of Australia's stockbrokers, gives you access to more than one million investors. Up to half of all daily ASX trades valued at some \$AUD 1.5 billion are processed by Shares™, so GBST Market Access™ is an opportunity worth serious consideration.

You can mobilise your sales force to target brokers with your products and services and deliver them via a secure electronic network. GBST's integrated front office workstation enables broker advisers to offer your products to their clients.

TAKE A LEAD FROM AUSTRALIA'S TOP FINANCIAL INSTITUTIONS AND PROVIDERS

Many of Australia's leading banks and institutions are already distributing their products and services electronically to GBST's network of stockbroker clients. These include Macquarie Bank Ltd. "Macquarie is continually looking for ways to improve its services to valued clients like GBST's network of brokers. The GBST network is obviously important, because of its size."

Mr McCorquodale, Head of CMT Sales at Macquarie Bank.

BUILD YOUR CASH MANAGEMENT BOOK WITH LESS COST

Shares™ cash management interface automates cash processing and streamlines receipts and payments between stockbrokers, cash management providers, and banks. Advisers can see client information, confirm funds, and on settlement of scrip, automatically debit or credit client accounts. Automated account management and cash management processing means CMT providers can grow their deposit books without growing their costs.

MASTER TRUSTS AND WRAP PROVIDERS

Managed funds are supported by Shares™ and the Advisor™ workstation, giving platform providers the ability to distribute their products via brokers to their clients from adviser desktops.

A SECURE, INDUSTRY STANDARD NETWORK

Developed in conjunction with the ASX, Optus' eFinity network provides a robust and highly scalable backbone for GBST's Virtual Private Network. Features of eFinity include:

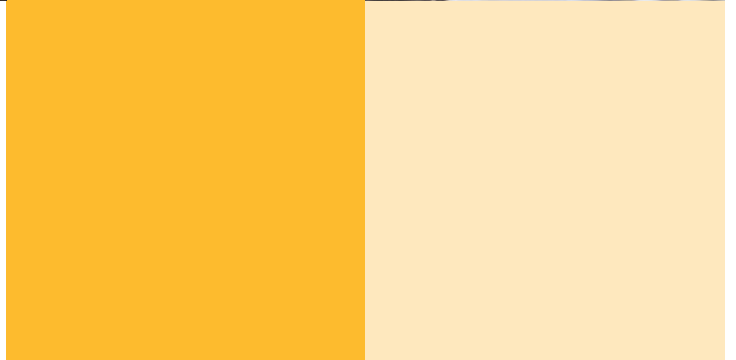

- + Robust frame relay/ATM infrastructure using MPLS
- + TCP/IP based
- + Fully managed and maintained service by Optus with service level agreements
- + The ability to support multiple applications on a common infrastructure
- + Flexibility to allow different methods of access dependent on user requirements
- + High security
- + Offshore connectivity

GETTING STARTED

Your interface may require specific development within Shares™ to suit your messaging requirements and GBST can help you determine how you would like to access our distribution network. The first step is to determine the business model that best suits your approach. Our team of Product Managers and Business Analysts can assist with the entire process from concept to implementation.

TALK TO US ABOUT YOUR PRODUCTS AND SERVICES

Take advantage of GBST's Market Access™. You could switch on one million new clients in real time.
